

Frictionless Procurement for Manufacturing

Axya removes manual work from manufacturing procurement, keeping buyers, suppliers, and ERPs aligned as RFQs, purchase orders, and updates move through the process.

Current State

Procurement Stuck in Fire-Drill Mode

Procurement is fragmented across emails, spreadsheets, and portals, forcing buyers to translate, systems to lag reality, and problems to surface too late.

✗ The result:

- Manual work becomes the workflow
- Buyers are burnt out
- Suppliers fall out of sync
- Deadlines get missed
- Production stalls
- Leadership operates without real-time visibility
- Your business absorbs the cost

With Axya

Bring Order to Your Procurement Chaos

Axya sits between buyers, suppliers, and ERPs, capturing every update and keeping everything aligned in real time for everyone involved.

✓ With Axya:

- RFQs and POs flow through one system
- Supplier emails become structured updates
- ETAs and PO changes stay in sync automatically
- Issues surface before production impact
- Buyers save 3–5 hours per week previously lost to inbox and spreadsheets

Axya complements

Built for Procurement Insight at Scale

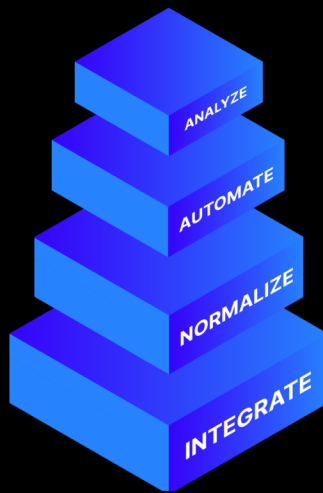

Axya connects fragmented procurement data, turns it into a reliable source of truth, and uses it to automate execution and deliver real-time insight across every supplier and order.

Analyze

Real-time visibility, alerts, and insights across every supplier and order.

Normalize

Clean, structure, and enrich fragmented supplier data into a single source of truth.

Automate

AI handles confirmations, follow-ups, updates, and repetitive execution.

Integrate

Capture data from ERP, email, EDI, supplier portals, Excel, and PDFs.

Built-In Intelligence

- Unifies fragmented data across emails, ERPs, portals, documents, and EDI
- Explains what changed and why by capturing context behind every update
- Surfaces risk early before issues escalate
- Automates repetitive execution while keeping buyers in control

The Axya Advantage

- No supplier portals or workflow disruption
- Works with your ERP, not around it
- A single source of supplier truth
- Designed for high-complexity, multi-supplier environments
- Scales as operations grow without adding headcount
